

Biography

Dr. Thorsten Teutenberg studied chemistry at the Ruhr University in Bochum, where he obtained his doctorate on the subject of "High-Temperature HPLC" at the Chair of Analytical Chemistry. In 2004, he moved to the Institute for Energy and Environmental Technology e. V. in Duisburg as a research associate. Since 2012, he has headed the Research Analytics & Miniaturization department. His scientific work focuses on the development of novel detection and coupling systems based on liquid chromatography, mass spectrometry and Raman spectroscopy. He is currently involved in the development of a fully digitalized laboratory of the future (FutureLab.NRW). He is also a permanent member on the scientific advisory board for the FutureLABS Live conference which takes place annually in Basel.
