

Biography

Dr. Martin Gilar (*1966) received his Ph.D. in analytical chemistry from Institute of Chemical Technology in Prague (1996). He spent postdoc years in Hybridon Inc. (1996-1998) and Northeastern University in Boston (1998) developing separation methods for antisense oligonucleotides and fraction collector for DNA molecules. Since 1998 he has worked at Waters Corp. in Milford, Massachusetts, participating in column, sample preparation and instrument research.

Dr. Martin Gilar is a Scientific Fellow in the Separations R&D group at Waters Corporation. He has more than 30 years of experience in the separation sciences, including chromatography, electrophoresis, and mass spectrometry. His research interest is the analysis of biopolymers, peptides, and nucleic acids. He has published over 70 peer reviewed papers. He is a recipient of Chromatographic Society Jubilee medal in 2022.
