A Fireside Chat about the Agilent Biopharma Toolkit

Dr. Jens Meixner, Dr. Andreas Otto, Dr. Andreas Mielcarek

Biopharma is characterized by a wide range of analytes and heterogeneous sample types. Therefore, a good toolset of techniques is needed to tackle various upcoming questions. Agilent offers an instrument and software portfolio ranging from dedicated HPLC & CE systems, high-end MS detection up to automation & data evaluation.

In this fireside chat we will ask Andreas Otto and Andreas Mielcarek, with both 10+ years of experience in the biopharma field, to elaborate on multiple techniques suited for the diverse questions in the biopharma space. Bring your question and take the toolset you need for lab.

Biography
Andreas Mielcarek

Andreas Mielcarek received his Doctorate in Bioanalytical Chemistry from the lab of Prof. Dr. Mohamed A. Marahiel at Marburg University. He joined Agilent 2017 as an Applications Scientist, developing LC/MS based methods on a wide range of instruments and molecules, and has recently become strategic Product Manager for Agilent's Bio and Online LC solutions.

Biography
Jens Meixner

Jens Meixner is a former PhD student at the University of Tübingen (Tübingen, Germany) and Aalen University (Aalen, Germany). He has worked for several years on the coupling of chromatographic and electrophoretic separation techniques including mass spectrometric detection. Since February 2017, he has worked as a strategic product manager at Agilent Technologies in Waldbronn, Germany. In this role, he focuses on new and intuitive workflows for LC and capillary electrophoresis techniques.

Biography
Andreas Otto

Andreas Otto is a biochemist and microbiologist by training from Greifswald University holding a PhD in mass spectrometry based proteomics. Having worked 10+ years as scientist mainly in LC/MS, he joined Agilent in 2018 as Product Manager HPLC serving core instruments and the Bio LC portfolio. Andreas' current role comprises responsibilities in the commercial Marketing team specifically in digital and outbound marketing."
