Call for Abstracts!

Abstract Submission Deadline – 16th January 2023

for oral presentations and Csaba Horváth Young Scientist Award

2nd May 2023

for poster presentations for consideration for Best Poster Awards

Registration opens 30th November 2022

Early Bird Registration Deadline – 20th April 2023

Dear [[First name]]

Improve your connections, enhance your dimensions at HPLC 2023

The 51st International Symposium on High Performance Liquid Phase Separations and Related Techniques (HPLC 2023) will be held at the Congress Center Duesseldorf (CCD) in Germany from 18-22 June 2023.

Since the first HPLC symposium in 1973, the series has established itself as the world's largest symposium on liquid chromatography and other liquid phase separation techniques. Part of the symposium is a large exhibition where suppliers of instruments, columns, software, consumables, and other analytical technologies present their latest developments and innovative products.

Get a glance of scientific topics and speakers at HPLC 2023

Several giants in the field have already confirmed their contributions to HPLC 2023. Their preliminary titles can be found on [the symposium webpage](#). They will shed light on the newest instrumentation and the present and future ability to cope with molecular phenomics, the comprehensive measurement of molecular systems. Some will explain how we can skillfully hyphenate separation sciences with mass spectrometry for multimodal analysis.

At HPLC 2023, delegates can enjoy the journey through the chromatographic universe reaching out to innovative and revolutionary column technologies. Miniaturized analysis formats by high-density droplet arrays for high throughput and single-cell analysis will guide us into the future.

It will be discussed how our new advanced analytical technologies can deal with the challenges of next-generation pharmaceutical characterization, allowing to resolve the high structural complexity of protein therapeutics and even look into biopolymer folding as well as molecular interactions using ion-mobility mass spectrometry. An industrial plenary will address the question of whether the digital transformation of the analytical laboratory is a big bang or just evolution.

The majority of lectures, however, will be selected from submitted abstracts. Therefore:

Shape the scientific program yourself by submitting your abstract today

The German host city Duesseldorf - A hot spot of modern architecture and Rhenish tradition in the heart of Europe

Duesseldorf frequently ranks among the ten foremost cities worldwide in terms of quality of life. Guests will be spoilt for choice with attractions such as the Altstadt – as the historic part of the city –, or its classy shopping mile – Koenigsallee –, the Rhine embankment promenade, which is perfect for biking and strolling, or the architecturally and gastronomically appealing Medien Hafen (Media Harbour) with its quality museums, theatres, concerts, cabarets, the opera house, and annual event highlights.

Come closer and experience the spirit of Duesseldorf [here!](#)
